PROJECTS

ConvoGen AI

Oct 2023 - Oct 2023

https://colab.research.google.com/drive/1a6LATySYKaS8qqfk_4maSaV4guvTRA-8?usp=sharing

It's a conversation AI chatbot trained on a custom dataset containing real information about me. The model can act as a virtual persona of me and answer questions related to me. Trained on T5-base model.

Anonymous chating app

Jul 2023 - Aug 2023

https://anon-exchange-lyart.vercel.app

This project empowers strangers to connect seamlessly, engaging in candid conversations without the constraints of identity. What sets us apart is our commitment to privacy, allowing users to create exclusive private chats.

Patent : Lung cancer classification

May 2023 - Jul 2023

I hold a patent with the title CLASSIFICATION OF LUNG CANCER USING DEEP LEARNING TECHNIQUES.

Life Overseas

Apr 2022 - Sep 2022

https://full-dashing-age.glitch.me/

This is a complete website based service I was working on. Which aims to provide learning solution to students, but the project got closed now.

My Portfolio website

Nov 2021 - Nov 2021

https://bedead.github.io/portfolio-react-threejs/

In this project I designed and developed my personal portfolio website.

Shape Out Android Game

May 2020 - Jul 2021

https://www.amazon.com/dp/B0999LHBYN/ref=apps_sf_sta

In this project I created a game named Shape Out which is available in Amazon appstore. Game design, Graphics, Music tracks, Characters, and application code all are done by me.

Simple-Browser software

May 2020 - Jul 2020

I created a simple browser msi software for desktop/pc.

MSC VIT AP

Feb 2023 - Present

https://msc-website.vercel.app/

This website is a university chapter and club website to showcase events and information about the chapter.
